The inventor of the double cased hermetic watch is open to debate since there are two patents for the design, one published in the U.S. in 1918 by Frederick Gruen and one published in Switzerland in 1921 by Jean Finger. The patent number on this example also belongs to Finger and was published in April 1930. It contains a few improvements over his original design and is particularly rare. Hans Wildorf, co-founder and managing director of Rolex, bought some rights to the Finger patent and also produced double cased hermetic watches, although by 1930 he had lost interest in this design and was already producing the Rolex Oyster case. Lot 251	45.95	Charles Newington - Visionary Artist. b 1950, British, AR. Grand Auctions is delighted to present the studio sale of Charles Newington., one of Britain's most original artists. Charles is best known in the Folkestone area for his White Horse on the Hill, a much loved local landmark and now the logo for Shepway District Council. From student days to the present, Charles has always felt himself the outsider following his own path and ignoring popular trends. He spent a number of years dedicated to working with leading artists, such as Patrick Procktor, as their master printer / etching technician. These were the years he acquired all the skills to develop his career in printing, painting and creating monumental monsters. Like his hero William Blake, he feels that he has developed an original inventiveness in creating new techniques. Charles' world has changed dramatically in the last few years. He was chosen by the Coast TV programmers to be the reincarnation of William Daniell painting today one of the coastal scenes so wonderfully depicted by Danniell in the early 19th century. He has been taken into the fold of one of London's most prestigious galleries, Whitford Fine Art, in Duke Street, St James's. Plymouth Council has asked him to create a monumental sculpture of GogMagog taken from the legends of Geoffrey of Monmouth in the 12th century. He is working with the story of Gog Magog on Plymouth Hoe. He has also designed two massive colossal sculptures of Gog and Magog for the London Gateway on either side of the Thames estuary in their later role as guardians of London. The visionary artists William Blake, Richard Dadd and Samuel Palmer are the inspiration for Charles. Imagination, original ideas and superb draftsmanship are the key to his work. His paintings are complex and deep, but most rewarding to study. It is so rare to come across the work of an artist with original and visionary ideas.
